

VetIMPRESS

Connecting data to support sustainable modern farm vet practice

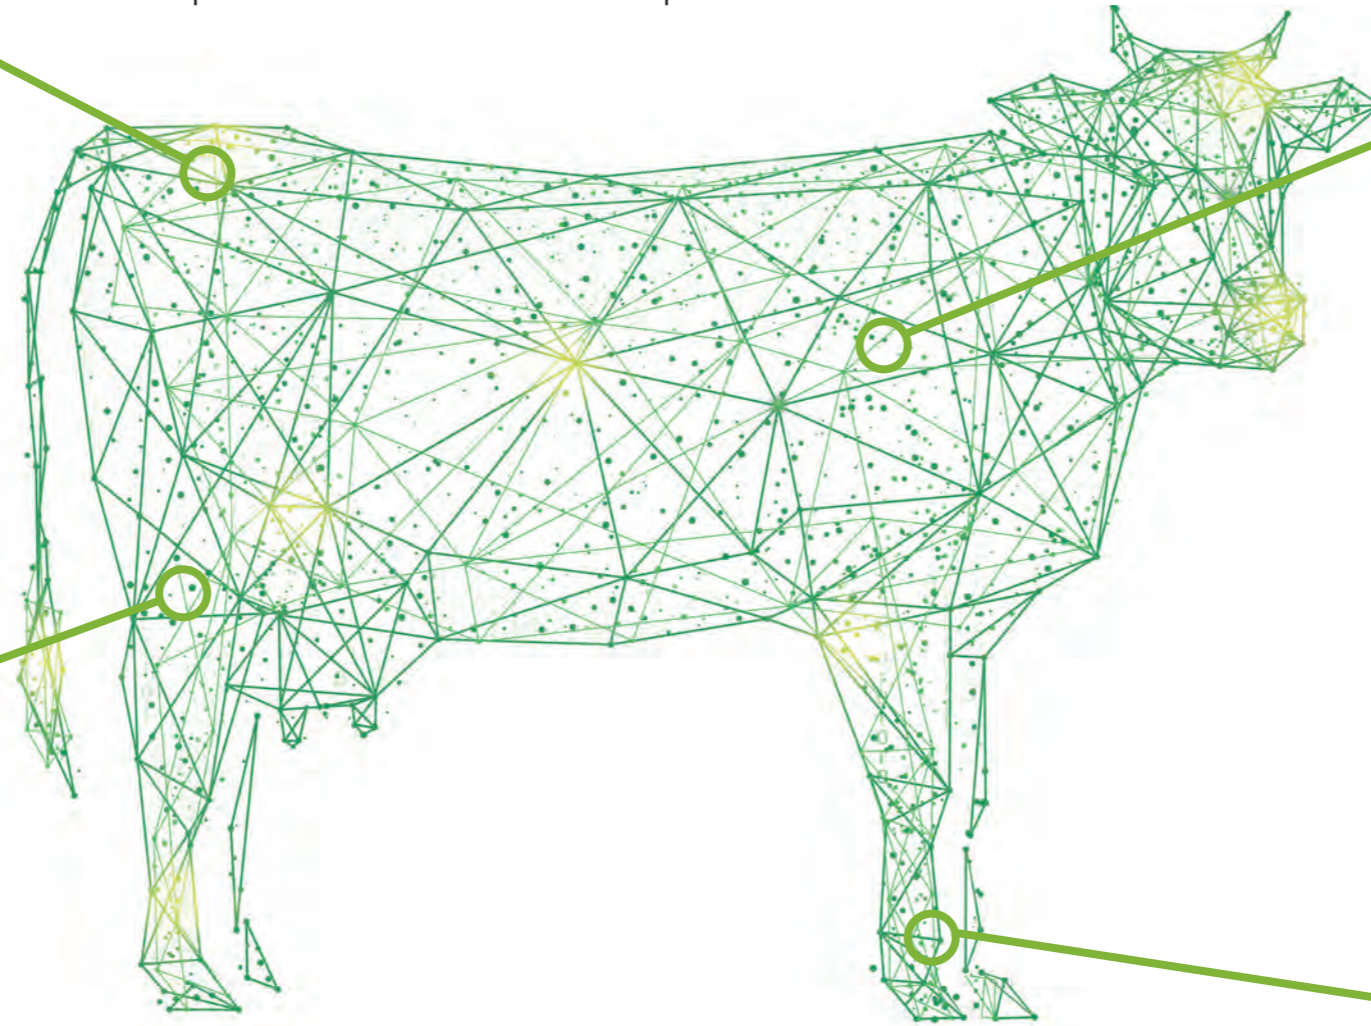

Providing solutions to address the day-to-day challenges faced by farm vets and their farmers.

KEY CAPABILITIES:

- Diary Management & collation
- Real-time product & service billing
- Antimicrobial Usage (AMU) reports
- Direct link the Medicine Hub for AMU uploads
- Farm Transactions & Vet Spend reports
- Vaccine & routine treatment reminders
- Farm event "alerts" – e.g. cows with high Somatic Cell counts
- Lab submissions & reports
- Farmer consent & permissions recorded
- Export of data for benchmarking & analysis
- On-farm label printing & car stock control

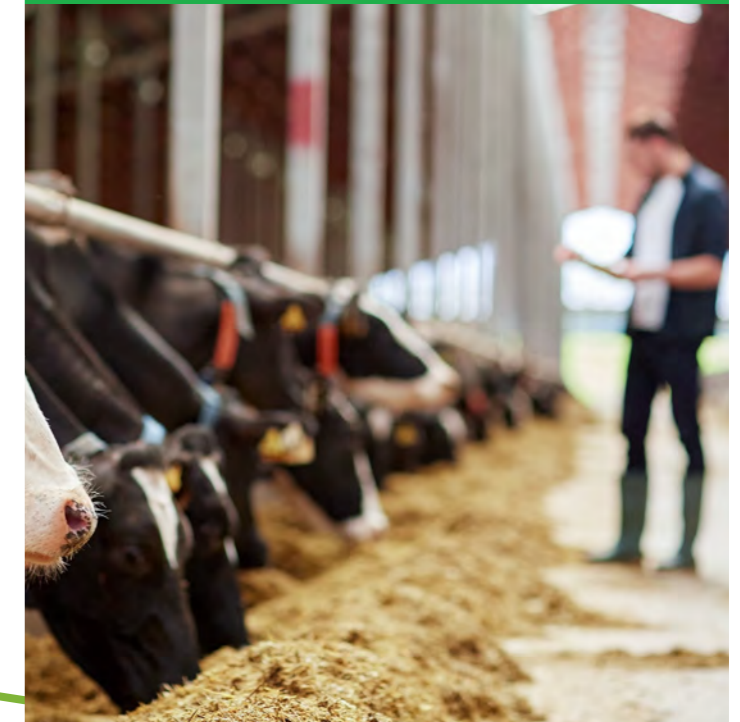

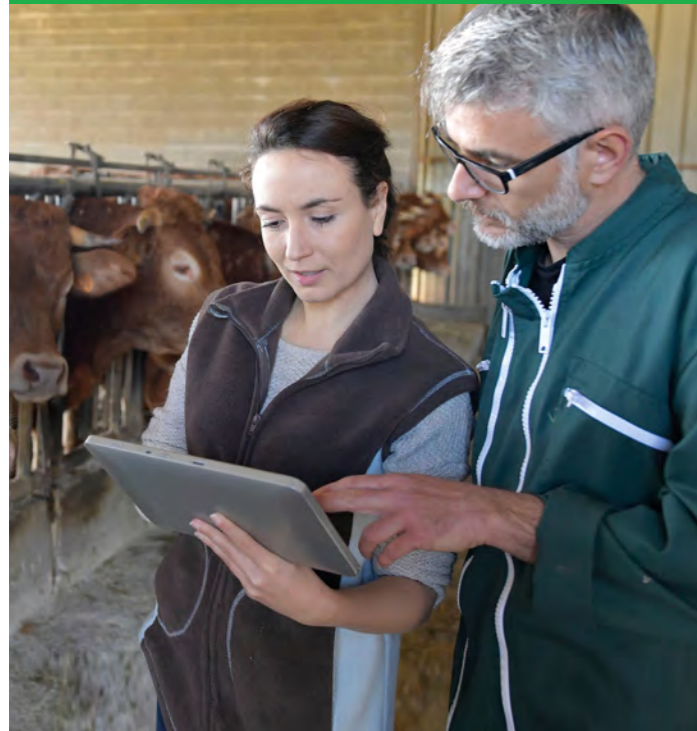

VetIMPRESS

VetIMPRESS has been developed by vets for vets. It standardises, integrates and consolidates external data, practice data, and data collected on-farm, into a powerful reporting platform, providing insights at multiple levels. VetIMPRESS offers support for the entire practice from Vets to Vet Techs & practice admin teams.

The data and insights shared with farm clients plays a fundamental role in the overall performance of the farm, the health and the welfare of the animals under care. VetIMPRESS makes this simple, efficient and environmentally friendly with "paperless" reports emailed direct to the farm.

- Mobility scoring
- Hoof trimming records
- Reproduction/fertility data
- Body condition scoring (BCS)
- Transition Cow Monitoring
- Calf health metrics
- Cleanliness Scorecard
- Management groupings

INSIGHTS

- External data sources
- On-farm facts & figures
- Analysis, alerts & actions

DECISIONS

- Evidence-based
- Data-based farming
- Working in partnership

ACTIONS

- Recorded
- Monitored
- Measured
- Coordinated
- Reviewed, revisited & revised

www.vetimpress.com

Protect livestock health, farm productivity and practice business with data that counts, all in one place. Work with VetIMPRESS to achieve more together.

Integrate systems and connect data

VetIMPRESS connects to:

Government Animal Movement database

VMD Product Information database

Milk recording companies

Farm Software, parlour systems & animal sensors

Laboratories

VetIMPRESS is designed to directly integrate with a Practice Management System (PMS). The level of integration (full two-way or one-way) is determined by the compatibility of the respective PMS. Two-way integration means any appointments, delivery notes and stock dispensing created in VetIMPRESS are directly synchronised with the PMS, whilst one-way integration means the same items require manual transfer to return to the PMS.

Client, patient, product, service and transaction data are transferred from the PMS to VetIMPRESS in both two-way and one-way integrations.

Every practice is different and VetIMPRESS is an extensive platform that can touch all parts of your business. Investing the time to learn and explore what VetIMPRESS offers will continually pay dividends.

TRAINING

TECHNICAL SUPPORT

If you require help with VetIMPRESS, log-in to your account to access our Help section. Unable to log-in? Contact us at support@vetimpress.com

"I have cow history in front of me. I can make data-driven decisions cow-side quickly & easily."

"... easy to use on farm & it has allowed much better clinical recording."

"We are making decisions based on the data & can demonstrate the value of our services."

"... vets now rely on their own records."

DON'T LEAVE THE PRACTICE WITHOUT IT!

Founded in 2010, VetIMPRESS is a product of Farmvet Systems Ltd. VetIMPRESS began when the company founder, an experienced farm vet, identified inefficiencies resulting from fragmented data management across the industry. The VetIMPRESS platform has developed and evolved, now boasting more than 100 external sources across 10 countries, reinforcing its position as a leading source of information for farm animal vets. In 2018, Farmvet Systems Ltd, the home of VetIMPRESS was acquired by Vetoquinol. Vetoquinol and VetIMPRESS share a mutual commitment to contribute to a healthier world through improving animal health and welfare. We know that we can achieve more together.
